SUMMARY

Full-Stack Engineer with 4+ years of professional experience building web, mobile and enterprise systems for fintech, logistics, EdTech, HR and enterprise teams. Works across ASP.NET, Java Spring Boot, Node.js, Python, React, Next.js and React Native, on SQL Server, PostgreSQL and MySQL, with AWS, Azure and GCP. Recently builds AI agents and self-hosted AI tools (Copilot Studio, RAG, OCR, computer vision) that answer from a company's own data. Brings a security mindset from penetration testing and VAPT remediation.

WORK EXPERIENCE

Full-Stack Engineer · PT. Wilmar Consultancy Services **Promoted (grade) Apr 2026**

Apr 2023 – Present · Medan

TechDev AI

- Built an **enterprise data agent** in Microsoft Copilot Studio (GPT-4.1) for analysts and managers, answering only from internal SQL Server data, with strict no-assumption rules and Indonesian/English replies.
- Built self-hosted AI tools: a private RAG document assistant, an OCR + LLM document reader, and a YOLO/SAM computer vision training studio (Python, FastAPI, Ollama, Docker).

Stack: Copilot Studio, Python, FastAPI, Ollama, RAG, YOLO, SQL Server, Docker, Azure Pipelines

TechDev

- Maintain and extend enterprise systems from user requirements: Terminal Warehouse Management (TWMS) and Packaging Management (PMS) on Java Spring and RabbitMQ; HR System, e-Recruitment and Face Absence Management on ASP.NET.
- Upgraded legacy systems to newer stacks, resolved VAPT security findings, and delivered desktop and IoT apps.
- Closed Jira tickets ahead of target; set architecture and coding standards with the team.

Stack: .NET, Java Spring, RabbitMQ, SQL Server, Next.js, Kotlin, AWS, Azure DevOps

Full-Stack Engineer · PT. Saba Semesta Perkasa (Tunas Logistik)

Aug 2022 – Apr 2023 · Jakarta

- Built a web and mobile logistics platform from scratch: real-time tracking, invoicing, master data and role-based access control.
- Defined the architecture and coding standards, managed team tasks and estimates, and met users to solve field problems.
- Delivered a scalable, secure and well-documented system that the next team can maintain.

Stack: Next.js, React Native, GraphQL, PostgreSQL, Figma

Full-Stack Engineer · PT. Mega Harapan Mulia

Jan 2022 – May 2022 · Jakarta

- Developed key features for the Kelas.com, Kelas.work and Kelas.Center learning platforms with UI/UX and project teams.
- Refactored legacy code into modular, maintainable parts and met weekly development targets.

Stack: Laravel, MySQL, AWS, Figma, Trello

Full-Stack Engineer (Intern) · PT. Finansial Integrasi Teknologi (Pinjam Modal)

Oct 2021 – Dec 2021 · Tangerang

- Built a B2B loan and assurance transaction dashboard with clear data summaries, replacing manual paperwork with paperless flows.

Stack: React, Node.js, TypeScript, PostgreSQL

Full-Stack Engineer · Desa Karang Bangun

Jul 2020 – Oct 2020

- Delivered the village website end to end with the local government, from hosting setup and UI design to the platform.

Stack: WordPress, MySQL, HTML, CSS
